3–5 Days	Onsite / Virtual	Interactive	Yes — Fully Tailored	Included

COURSE OVERVIEW

Global supply chains continue to face growing disruption exposure driven by geopolitical instability, economic uncertainty, supplier dependency, transportation bottlenecks, cyber risks, and regulatory changes. This in-house training program helps organizations strengthen supply chain resilience strategies, improve risk identification capabilities, and enhance operational continuity planning in complex business environments.

BUSINESS CHALLENGES ADDRESSED

- Supply chain disruption exposure
- Supplier dependency and concentration risks
- Inventory volatility and lead-time uncertainty
- Operational continuity planning gaps
- Lack of supply chain visibility
- Global sourcing vulnerabilities
- Risk identification and mitigation gaps
- Crisis response coordination challenges

KEY LEARNING OUTCOMES

- Identify key supply chain risks and vulnerabilities
- Evaluate supply chain resilience maturity
- Improve supplier risk assessment and monitoring
- Develop operational continuity and response strategies
- Strengthen supply chain visibility and risk reporting
- Improve crisis response coordination
- Implement practical resilience frameworks
- Align resilience planning with operational priorities

COURSE MODULES

01 Supply Chain Resilience Fundamentals

Key principles, disruption trends, and resilience vs. efficiency trade-offs.

02 Risk Identification & Assessment

Types of risks, dependency mapping, and vulnerability assessment frameworks.

03 Supplier Risk & Vendor Resilience

Supplier evaluation, third-party risk visibility, and diversification approaches.

04 Inventory, Logistics & Continuity

Buffer strategies, logistics risk, and continuity planning for critical supply operations.

05 Crisis Management & Disruption Response

Response planning, cross-functional coordination, and incident best practices.

06 Supply Chain Visibility & Monitoring

Visibility principles, resilience KPIs, early warning indicators, and escalation processes.

07 Building Long-Term Resilience

Embedding resilience into strategy, governance structures, and continuous improvement approaches.

WHO SHOULD ATTEND

Supply Chain Managers • Procurement Managers • Logistics Managers • Operations Managers • Warehouse & Distribution Professionals • Supplier Management Teams • Planning & Forecasting Professionals • Business Continuity Personnel • Risk Management Professionals
