Why This Programme?

Strengthen Resilience

Build supply chain capability to withstand disruption, volatility, and uncertainty.

Reduce Operational Risk

Identify, assess, and mitigate critical risks before they impact business performance.

Improve Continuity

Develop practical response plans that protect service levels and operational flow.

Drive Performance

Improve visibility, collaboration, and decision-making across the supply chain.

Business Challenges Addressed

- Increasing supply chain disruptions and volatility
- Global uncertainty and geopolitical instability
- Supplier dependency and concentration risks
- Inventory volatility and demand unpredictability
- Operational continuity planning gaps
- Limited end-to-end supply chain visibility

Key Learning Outcomes

- Identify major supply chain risks and vulnerabilities
- Assess business impact and prioritize mitigation actions
- Develop practical resilience strategies and frameworks
- Strengthen supplier resilience and collaboration
- Improve visibility, agility, and decision-making
- Build long-term continuity and resilience capability
